

DMIT_2007-10-17

Attendees: Roy Mendelssohn, Steven Anthony, Jon Burroughs, John Ullmer, Ted Habermann, Julie Bosch, Susan Starke, Peter Grimm, Tina Chang

- Response to DMC - Has been provided to DMC we will wait for their response
- Standards recommendations (available as discussion pages from [Standards Working Group]) will be forwarded to DMC when team structure is figured out.
- John Ullmer voiced concern about the context of standards that we might approve. He suggested that it should be clear where those standards fit in to the Business and IT architectures.
- Outreach - Ted and Julie will both be at the NASA Earth Science Working Groups meeting next week.
- New Idea - DMIT meetings might include short presentations from people in NOAA that are working on projects that are consistent with the GEO-IDE Principles. The goal of these presentations would be to educate DMIT members about projects in NOAA and to extend the "GEO-IDE network".
